Please [contact us](#) for a telephone number for the date you plan to attend

LEADERING™ GLOBAL COMMUNITY EVENTS

Free Supporter TeleClinics for Leadering™ Support Teams and Professionals

for current or past enrollees of the Leadering Paradigm Shift Program

Individuals, organizations, companies, communities, and countries can benefit from support to make the paradigm shift and operate effectively in the Leadering paradigm. These brainstorming teleclinics provide advice, ideas, strategies, and shared experiences to assist Leadering professionals providing support with

- evaluating the patent-pending Leadering™ paradigm shift program for organizations
- strategizing the implementation of corporate paradigm shift programs
- supporting employees going through the Leadering™ Paradigm Shift Program
- supporting the implementation of corporate paradigm shift programs
- supporting the implementation of customer, supplier, and business web paradigm shift programs
- operating as the Leadering SWAT team for their organizations, especially those composed of retired executives.

Based on demand. [Email](#) for details on the next event for yourself or your team

Leadering™ is the industry standard for the development of the meta-competencies and drives innate to natural leaders, entrepreneurs, innovators, and high achievers.

Leadering™ improves the assimilation of the competencies and skills offered by traditional leadership and performance development programs by installing the requisite dynamics, drives, and capacities required to use them.

LEADERING™ GLOBAL COMMUNITY EVENTS

Entrepreneuring and Field Breakthrough Intensives based on maximizing key individual or organizational talents

for current or past enrollees of the Leadering Paradigm Shift Program

These run periodically.

Where possible we try to group individuals facing common challenges into the same programs.

Please [email us](#) for information of upcoming events.

Entrepreneurial success usually depends on how perfectly matched the company is to the entrepreneur's natural evolutionary path so that the entrepreneur is always doing the work he or she loves to do - work which elicits peak performance - allowing entrepreneurs to continuously break new frontiers on doing their art. This is the ideal formula for achieving their greatest business success. Co-evolutionary strategy which overlays the individual evolutionary path with that of the proposed company will ensure the success of both.

This program is a 6-week intensive for those who are either in or from corporations and who wish to *recareer* into their own entrepreneurial company designed to capitalize on their strengths, talent, passions, and natural evolutionary path. This group will include baby boomers who are retiring from corporate jobs who wish to have another career built around the work they are passionate about.

Since this is an action-learning/action-evolving program, participants need to be ready to implement the new company even if they do not know what that company will be. Competitive uniqueness at the frontier of new territory will be sought for each entrepreneur. The action-learning/action-evolving process used to bring the new company into existence is also the new modus operandi we will be installing/instilling to ensure each executive has the entrepreneurial capacity to sustain the company.

This is a customized, distance-learning, international program which capitalizes on the Leadering paradigm and on maximizing, advancing, and capitalizing on human systems for goal achievement and creation. The components of the program are listed below:

- intensive one-on-one strategy development with Lauren Holmes.
- telecalls are supplemented with a combination of multimedia and internet-based instruction.
- action-based teleclinics run by our idea generators and implementation managers,
- peer partnering with all participants and our support team,
- creative brainstorming and idea generation for how best to proceed
- focused quantum leaps
- simple webpages will be developed to capture and promote a company aligned to your natural evolutionary path in the Leadering paradigm.

You will be learning while doing and capitalizing on the experiential learning of others on how to not only be entrepreneurial but how to harness natural evolutionary forces to accelerate your progress and your development of advanced functionality to achieve your most advanced state and greatest life-time performance and contributions.
